Profile

IT Support Technician with 3 years of experience in the public sector, specialized in resolving complex technical incidents (levels 1-2) and infrastructure administration (Windows Server, Active Directory, VPN). Beyond routine support: I automate with PowerShell, design with Terraform and Azure, optimize processes. Seeking an IT Support role where I can leverage my deep technical expertise and truly contribute to infrastructure optimization.

Employment

IT Technician

Feb 2023 - Jan 2026

Secrétariat du Conseil du trésor, Quebec

- Analysis and Resolution of Complex Technical Incidents (Level 1-2).
- Windows Server and Active Directory administration (access management, GPO, accounts).
- VPN configuration and network support (DNS, DHCP).
- Priority management and SLA compliance in multi-user environments.
- Installation and deployment of workstations, peripherals, and software.
- Structured escalation to specialized Level 2-3 teams.
- On-site and remote user support.
- Administration of Microsoft 365 and Azure Entra ID environments, including identity, access, and permission management.

IT Technician

Jan 2023 - Feb 2023

Techno-Conseil, Quebec

- Workstation installation and configuration.
- Rapid resolution of technical issues on-site and remotely.
- Basic network support (DNS, DHCP, connectivity).
- Ticket management and user support.

IT Technician

Aug 2022 - Jan 2023

Ministère des transports de Québec, Quebec

- Deployment and configuration of workstations, software, and network equipments.
- Maintenance and updates of user environments.
- On-site and remote technical support.
- Incident management and prioritization to minimize service interruptions.

Skills

Technical environment:

Windows Server 2008–2019 | Active Directory | Azure Entra ID | VPN | DNS | DHCP | VMware | Microsoft 365 | SLA Compliance

Tools & Support: GLPI | Jira | Remote access tools | Software deployment

Advanced/Cloud : Terraform | Microsoft Azure | Automation (Power Shell, Python) | Infrastructure as Code | Azure Firewall | Load Balancing | Disaster Recovery

Others Skills : SQL, Power BI, Docker, Node.js, Excel

Languages

French

English

Hobbies

■ New technologies and innovations

Education

Bachelor in Programming and Analysis (online) Sep 2025 - Present

Collège Algonquin, Ottawa

- Proficient in multiple programming languages including Python, and SQL, emphasizing practical application and problem-solving.
- Strong foundation in data structures, algorithms, and system analysis for efficient program design and implementation.
- Experience with database management and querying, including relational databases and basic data modeling.

Certificate in IT Technical Support Sep 2021 - Jul 2022

Collège la Cité, Ottawa

Achievements

Infrastructure as Code & Cloud Architecture - Azure Terraform Project

- Designed and deployed secure, scalable cloud infrastructure on Microsoft Azure using Terraform (Infrastructure as Code)
- Implemented VM Scale Sets (VMSS) with autoscaling and load balancing across multiple Azure regions
- Architected multi-region failover solution with Azure Traffic Manager for high availability (99.99% uptime)
- Deployed comprehensive security framework: Azure Firewall, Network Security Groups (NSGs), RBAC, Azure AD, MFA
- Configured geo-redundant storage (Blob Storage) with automated backups and disaster recovery procedures
- Implemented monitoring and alerting: Azure Monitor + Log Analytics for real-time infrastructure health tracking
- Automated infrastructure provisioning and cost management using Azure Automation runbooks
- Demonstrated ability to design enterprise-grade infrastructure, bridge IT operations and cloud technologies
